

# Hide objective until start date

Last Update: 10/05/2018

## 1. Overview

---

Individual objectives can be hidden on the product page until a specified start date has been meant for the objective. This option can be useful if access is not restricted to just the linked objective in the case of a LMS integration where by students can navigate to the product page from the linked objective. If an instructor's preference is for student to not have access to prior objectives until a specific time the following steps can be taken to hide an objective.

## 2. Configuration Setting

---

### 2.1. Access the objective

- From the Curriculum view, click on the *Product* tab and either create a new objective and then click *Edit* or locate the existing objective and click *Edit*.
- Once in the objective properties page, access the *Timing Data* area.
  - In *Date* field under *The start date can be specified absolutely or can be specified as an offset from a binding objective* specify the start date.
  - Then in the *Options* check the box for *Hide objective if start date has not been reached*.

▼ Timing data

The start date can be specified absolutely or can be specified as an offset from a binding objective

Date

10/8/2018

Offset

Days

Weeks

Months

The finish can be specified as an offset from the start date that is used.

Offset

Days

Weeks

Months

Options

☒ Hide objective if the start date has not been reached

☐ Hide objective if the finish date is passed

- Click on *Save Changes*
- Repeat steps for all required objectives.

This configuration will hide the specific objective from the student until the specified start date.

### 3. Example Student View

Student project page prior to hiding *Sample objective 2*.
